

We have designed this reference guide to make it easy to order key blanks to fit our locks. The chart on pages 41-47 allows you to quickly match any Abus, Craftsman® or U-Haul® padlock to its key blank. The diagram next to the photo of each key shows the end view of the key blank and the lock hole it fits into, and indicates whether the key blank is a "right-hand" or "left-hand" blank.

- All pictures of key blanks are shown at actual size
- All blanks are brass, with nickel-plated, with the exception of the 38 series blanks, which are steel.
- All blanks are packaged 50 pieces per box.
- For best results, use original **ABUS** key blanks!

If you know your lock model number:

- Find your lock number in the appropriate list on the back pages of the key guide.
- Look across the row corresponding to your lock model number.

83KxK/50
2" width

- Your lock works with every key blank listed. If your lock is one of a "series" (e.g., "41 Series") your lock can be used with any key blank that works with that series.

Key blank photos and diagrams:

- **Your key blank may have a different "bow" than the one pictured.** Therefore, you should focus on the "blade" of the key (at right in the picture), the portion that fits inside the lock, when you attempt to match an unknown key blank to a photo.
- **Your lock may require a right-handed key blank or a left-handed key blank.** Left-handed key blanks physically will not fit into right-handed locks, and right-handed key blanks will not fit into left-handed locks.
- You may determine whether your key blank is right-handed or left-handed by referring to the diagrams shown

beside each key blank below its name. (If you don't know your key blank number, refer to the chart on pages 39-45 as directed above.) There are two parts to each diagram. The left part shows a **view of the lock's keyhole**. The right part shows a **view of the edge of the key blank** as you hold the tip "pointing" toward you. Right-handed key blank views are labeled "R" above the key view; left-handed key blank views are labeled "L".

- The number of your key blank may end in "-R" or "-L". Key blank numbers ending in "-R" correspond to right-handed key blanks, and key blank numbers ending in "-L" correspond to left-handed key blanks.
